Highlighted more than 50% Unpaid Claims

Distribution of Paid and Unpaid Claims by Ethnic Origin

Ethnic Group	Paid	Unpaid	Total
NonHispanic	7453	8154	15606
Hispanic	1593	1600	3193
Unknown	464	737	1201
Total	9510	10491	20000

Observation: A significant portion of unpaid claims belongs to the Asian community.

Recommendation: To address potential language barriers, consider employing support staff who are fluent in relevant languages to improve communication and assistance for this demographic.

Age Distribution of Unpaid Claims:

Observation: The age groups of 25-45 show high volumes of unpaid claims, while young adults (under 18) also have over 60% unpaid claims.

Recommendation: Focus efforts on awareness programs targeted at younger generations to inform them of claim procedures. For claimants under 18, review eligibility criteria to ensure clarity regarding their access to benefits.

Gender Disparity in Unpaid Claims:

Observation: Males have more than 50% of unpaid claims compared to females.

Recommendation: Investigate underlying factors contributing to this discrepancy, such as differences in claim processes, or documentation accuracy.

Educational Impact on Claim Status:

Observation: Individuals with only high school or primary school education have a high percentage of unpaid claims.

Recommendation: Consider implementing educational support or resource guides to assist claimants in understanding and completing claim procedures, potentially reducing unpaid claim rates among less-educated groups.

Requirement 3

Top 10 Occupations

Occupation	Number of Customers
General and Operations Managers	763
Customer Service Representatives	675
Heavy and Tractor-Trailer Truck Drivers	478
First-Line Supervisors of Office and Administrative Support Workers	425
Marketing Managers	412
Sales Managers	382
Software Developers	345
Stockers and Order Fillers	307
Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products	294
Laborers and Freight, Stock, and Material Movers, Hand	287
Total	4368

Top 5 Occupations (Female)

Occupation	Number of Customers
Cashiers	184
Customer Service Representatives	467
First-Line Supervisors of Office and Administrative Support Workers	296
General and Operations Managers	303
Marketing Managers	164
Total	1414

Top 5 Occupations (Male)

Occupation	Number of Customers
General and Operations Managers	460
Heavy and Tractor-Trailer Truck Drivers	423
Marketing Managers	248
Sales Managers	274
Software Developers	297
Total	1702

Top Occupations Overall:

- **Observation:** General and Operations Managers, Customer Service Representatives, and Heavy and Tractor-Trailer Truck Drivers lead the list, suggesting that these roles are highly represented in the claim data.
- **Recommendation:** These occupations may require specific support or resources in managing claims due to their high claim volume.

Gender-Specific Occupations:

- **Female Dominated Roles:** The top occupations for females include Cashiers, Customer Service Representatives, and Office Support Supervisors.
Insight: Many of these roles involve customer-facing or administrative tasks, potentially indicating different claim needs or challenges compared to male-dominated roles.
- **Male Dominated Roles:** Males are primarily represented in roles such as General and Operations Managers, Truck Drivers, and Marketing Managers.
Insight: The high representation in managerial and transportation roles for men may call for targeted communication strategies to address their specific claim concerns.

Conclusion:

- **Support and Training:** The high volume of claims in certain occupations highlights the potential need for role-specific training in claims procedures.
- **Tailored Outreach:** Occupation-specific support, particularly in top male and female roles, could improve claim handling and reduce unpaid claims.

Requirement 4

Analysis:

- 1. **Gender:** The majority of veterans with claims are male (678), with males having a significantly higher unpaid claim rate compared to females.
- 2. **Race:** Most veterans with unpaid claims are White, followed by smaller numbers in Black and Asian groups. These may face additional challenges in the claim process.
- 3. **Age:** Veterans aged 25-64 have the highest claim activity, with a mix of both paid and unpaid claims. Younger veterans (18-24) show a lower claim count, indicating potential underutilization of benefits.
- 4. **Education Level (Male Veterans):** Veterans with only a high school or undergraduate education level show the highest unpaid claims.
- 5. **Occupations:**
 - o **Male Veterans:** Truck drivers and electricians top the list of occupations with the most unpaid claims.
 - o **Female Veterans:** Customer service roles and managerial positions show the highest paid claims, suggesting greater success in claim processing in these fields.

Suggestions:

- 1. **Educational Support:** Offer targeted guidance and resources to veterans with lower education levels, such as high school-only backgrounds, to improve claim success rates.
- 2. **Occupation-Specific Assistance:** Provide claim support resources for male-dominated roles with high unpaid claims, such as truck drivers and electricians.
- 3. **Awareness Programs for Younger Veterans:** Encourage claim awareness and support for younger veterans (under 25) to ensure they understand and can access their benefits.

Requirement 5

Monthly Trend of Paid and Unpaid Claims

Claim_Status ● Paid ● Unpaid

Monthly Trend of Paid and Unpaid Claims:

Observation: There is a sharp increase in unpaid claims from July onwards.

Insight: The increasing trend, especially in unpaid claims, indicates a potential issue in processing claims effectively as the year progresses. This could suggest a need for additional resources or process improvements to handle the volume.

Note- I also compared the July months paid with august month unpaid, with all demographics other than what we did, there are no significant insights.

Top 10 Customers with the Highest Paid Amount

Customer_ID	AMT_PAID	GENDER	VETERAN	Education_Level
1454900	21360	F	Yes	High School (9-12 years)
2085627	21360	F	Yes	Postgraduate (17-20 years)
54483	20648	F	Yes	Postgraduate (17-20 years)
1663385	20648	F	Yes	Postgraduate (17-20 years)

2082192	19936	F	Yes	Postgraduate (17-20 years)
1063575	16746	F	No	Undergraduate (13-16 years)
1018839	15262	M	No	High School (9-12 years)

2. Top 10 Customers with Highest Paid Amounts:

Demographic Patterns: The majority of high-paid claim recipients are female veterans with varied education levels, from high school to postgraduate degrees.

Education Levels: Higher education does not necessarily correlate with the highest paid amounts, as individuals with only high school education are also represented.

Veteran Status: Most top-paid customers are veterans, which may reflect prioritized or better-managed claims for this group.

Suggestions:

Veteran Support: Consider maintaining or enhancing support for veterans, as they represent a significant portion of high-paid claims. We need to focus on Male veterans as they are not receiving the claims.
